TO WHOM IT MAY CONCERN,
Subject: Recommendation Letter

Dear Sirs/Madams,

Mr. Cuong is currently an undergraduate student with a major in computer science at Phenikaa University. I have known Mr. Cuong for more than a year, since he entered the university and joined my AIoT Lab. Under my supervision, he gained a lot of experience working on generative model, anomaly detection and deep learning-based intrusion detection for wireless internet of things (IoT). Through these research projects, he has shown to be an active and intelligent student that I was truly impressed. Additionally, during the discussion, he was able to promptly understand the research problem as well as the initial ideas.

Although Mr. Cuong has just started his second year in university, he achieved impressive academic achievements that I rarely witness in other fresh students, even with senior students. First of all, he won the first prize in the scientific research contest organized by the faculty of computer science, and then won the second prize at the contest organized by the university. Not only that, he was also a first author of a conference paper that was accepted at the APSIPA 2022 conference, where he was awarded a travel grant to travel to Chiang Mai, Thailand presenting his paper in this November. Furthermore, he has extended this work to a long paper, which has been submitted to Journal of Network and Computer Applications (Q1-ISI, IF7.574). Such research achievements are rarely seen for a fresh student and even difficult for a graduate student.

I am very pleased to hear that he is currently looking for an opportunity to develop his research skills at VinAI, which is widely known as a leading AI company in Vietnam. I strongly support his application and would like to recommend Mr. Vuong Tuan Cuong to be a member of your company. With his outstanding achievements and intensive research experience, I believe that he will learn and achieve more success in his future studies and research.

If you have any further questions about Mr. Cuong, please do not hesitate to contact me via both my phone and email given in this letter.

Sincerely,

Luong Van Thien, PhD
